

# PPG Connect

**PERIMETER  
PROTECTION  
GROUP**

**CLIMATE NEUTRAL  
COMPANY**  
certified by Fokus Zukunft

PPG Connect is the smarter way to control and monitor your entrance systems.

Monitor and control just one system or a network of sites, in multiple locations.

No need for expensive replacement passcards or radio transmitter fobs. Authorised users can simply use the free PPG Connect App to open/close your gate, barrier, or bollard system.

## Easy to Install

PPG Connect can be used for all PPG Access and High Security Products.

Installed ready to use in all new PPG products, including a 3 month trial subscription.

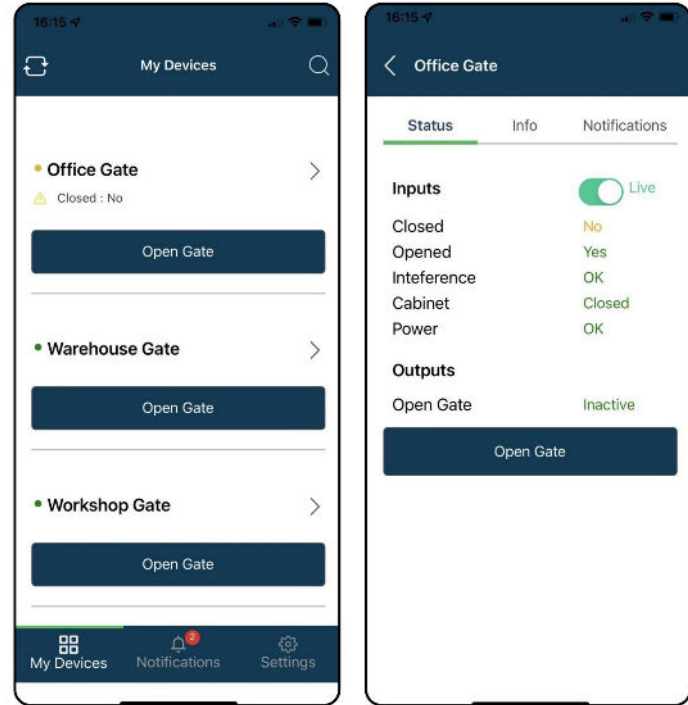

Third party or existing PPG products can be easily retrofitted.

## Condition Monitoring

The 24/7 condition monitoring maximises both safety and reliability and sends an email or a push notification to your mobile phone immediately in the event of a malfunction.

This enables a quick response and fast rectification of errors.

## Predictive Maintenance

PPG provides\* on-demand scheduled maintenance based on performance and usage data collected by PPG Connect.

Failures due to unexpected high usage are avoided and your entrance systems remain reliable.

Allowing you to focus on your core business, while we take care of your perimeter protection.

\*for more information on our maintenance contracts, please contact our service department

## Full Smart Control

Manage more than 1000 users, create schedules for user groups and grant access authorisations for temporary visitors with just a few clicks.

Users with access authorisation, just need to download the free PPG Connect app to operate your entrance system.

PPG Connect App	Technical Data
